Art Unit: 2652

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species I - Line 8 on page 60 thru line 6 on page 65 and corresponding drawings.  
Species II - Line 8 on page 65 thru line 18 on page 69 and corresponding drawings.  
Species III - Line 20 on page 69 thru line 17 on page 76 and corresponding drawings.  
Species IV - Line 19 on page 76 thru line 9 on page 80 and corresponding drawings.  
Species V - Line 10 on page 80 thru line 27 on page 84 and corresponding drawings.  
Species VI - Line 29 on page 84 thru line 9 on page 87 and corresponding drawings.  
Species VII - Line 11 on page 87 thru line 7 on page 93 and corresponding drawings.  
Species VIII - Line 9 on page 93 thru line 25 on page 103 and corresponding drawings.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 C.F.R. § 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 2652

2. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: Each species details a mutually exclusive characteristic of a cassette as evidenced by the distinct description and representation thereof with a different figure or set of figures. A search for one of these mutually exclusive characteristics is not coextensive with a search for the other mutually exclusive characteristics and therefore these species lack the same or corresponding special technical features.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 C.F.R. § 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(i).

5. Any inquiry concerning the above referenced application should be directed to the examiner, Craig A. Renner, whose telephone number is (703) 308-0559, and whose facsimile
